## CAREER OBJECTIVE

---

Enthusiastic and detail-oriented professional with 11 months of experience in SAP ABAP development, including Adobe Forms and custom report generation. Eager to transition into an HCM Functional Consultant role with a focus on Benefits Implementation. Looking to leverage technical expertise in system configuration, process optimization, and cross-functional collaboration to support successful end-to-end implementations. Skilled in Python and SQL, with a strong commitment to delivering user-focused solutions and post-implementation support.

## WORK EXPERIENCE

---

### SAP ABAP Developer

*Accenture Solutions – Mumbai | 05/2024 – Present*

- Developed and maintained enterprise system development, specializing in Adobe Forms, report building, and backend process automation.
- Collaborated with cross-functional teams and clients to gather requirements, analyze issues, and implement technical solutions.
- Gained hands-on exposure to SAP HCM module—employee master data, time management, and payroll data structures.
- Participated in full development lifecycle: requirement gathering, design, coding, testing, and deployment.
- Created and maintained technical documentation to support updates, training, and user adoption.
- Suggested process improvements and supported workflow automation within SAP.
- Delivered technical walk-throughs and supported end-users during issue resolution and training sessions.

### Key Achievements:

- Delivered enhancements under tight timelines, earning recognition for rapid ramp-up.
